Let your next
design masterpiece be a

Wesco Custom Creation.

This is a guide of our most popular
styles & designs. However, if you
have a different project, we
would be happy to create
it in our workroom.

*Yardage requirements are based on a 27" repeat.

Lining Notes

800.950.9372 • 303.388.4101

Lightweight/Medium Weight Linings:

Polysheen 54, Roc-Ion FR, Roc-Ion RNS, Sateen, Supreme Sateen 54, Sussex, Wideline, Winston

Lightweight drapery linings are typically cotton/polyester blends. Premium linings are typically 100% cotton and medium weight. Both are easy to work with and drape well. Both offer sun protection. They diffuse light, but do not block out light. Adding Interlining will help. Sateen linings offer a luster finish. Many are crease, water and stain resistant. Check labels for flame retardancy.

Light Diffusing/Room Darkening Options:

Thermalsuede

Thermalsuede lining can be used with all weights of fabric and offers sun protection. It diffuses the light, but does not offer total blackout. It will add some insulation value to your treatment. More insulation value can be added if interlining is also used.

Blackout Linings:

Atlas, Blackout, Lights Out

Blackout linings work well with medium to heavyweight fabrics. In all but Atlas, stitching may cause pinholes that let in some light. If you want the total blackout benefits on a lighter weight fabric, use interlining to add body to the drapery fabric. This lining offers total blackout of daylight through the drapery treatment and offers sun protection to your decorator fabric. Blackout linings have great body and will not crack, peel or bubble. They have a built in sound barrier to ward off out-of-the-room noises at the window. When using blackout lining, pay special attention to your choice of hardware and the mounting methods because of the heavy weight of your total treatment. Atlas is our newest blackout lining. It has a soft hand, is totally light blocking, and is a thermal and noise insulated 100% polyester drapery lining. It will not show pinholes and will not delaminate or crack.

Combination Linings:

Commando, Sateen Combo

Sateen Combo and Commando are a combination of our premium sateen drapery lining with the added bonus of thermal and noise insulation. The sateen side of the fabric is finished with the softened luster of classic sateen drapery liner. On the backside, the fibers are raised to give the fabric its luxurious hand and full body for enhanced drapability.

Interlinings:

Bump Cloth, Interlining

Interlinings are often used with silks or faux silks to add body, fullness, luxury and softness to the draperies. Interlining is a soft, 100% cotton flannel material that is placed between the drapery and the lining materials. It adds body and weight, as well as thermal and noise insulation. Bump Cloth is a 65% cotton blend. It is thicker than our standard interlining. Bump Cloth adds weight and fullness, thermal and noise insulation as well as wrinkle resistance to enhance the most luxurious window treatments.

Flame Retardant Fabrics:

Flameout, Lights Out FR, Roc-Lon FR

All of these fabrics meet NFPA (National Fire Protection Association) 701 code.

Fabric Characteristics & Care

800.950.9372 • 303.388.4101

These characteristics are not considered defects and therefore, not reasons for returning fabric.

Bow, Bias And Seam Matching

The industry standards are 1-1/2" to 2" for bow and bias. Some print and solid patterns may have difficulty with seams matching.

Brocade Patterns

These fabrics may have a rippling effect which is a natural characteristic of jacquard weaves.

Double Rubs

Double Rubs is a measure of abrasion resistance using the Wyzenbeek Double Rub method. A medium duty upholstery fabric will have a rating of greater than 15,000 Double Rubs. A heavy duty upholstery fabric will have a rating of greater than 30,000 Double Rubs.

Dry Cleaning

Use a reputable dry cleaner that specializes in home furnishing. Dust has impurities which affect fabrics. Vacuum fabrics often. Dry cleaning should be at regular intervals before excessive soil has accumulated. Very few fabrics are washable.

Dyelot Match

If an exact dyelot match is required, please send swatch of material for match. Otherwise, we will ship the dyelot as close to the sample as our stock permits. We cannot accept the return of cut yardage material for full credit because the dyelot is off in cases where a swatch was not sent with the order for match.

Finishes

Applied finishes may help fabrics resist soil and stains, but does not eliminate the necessity of properly caring for fabrics.

Flaring

Flaring custom drapery returns is a natural characteristic of many fabrics, especially those woven from synthetic fibers. If flaring is a problem with your client, we recommend memory stitching when fabricating custom draperies. Some casements and polyesters have a tendency to flare. Flaring is not a reason for return.

Handwoven and/or Silk Fabrics

Many fabrics are created by home hand weavers thus creating unique qualities. Dyelot variations, inconsistent weaving, heavy threads, wrinkling, flaws, colored yarns, holes, pattern repeats that vary within the same yardage, loose threads, missing yarns and threads, missing beads, pearls, incomplete appliques, puckering around embroidered silks and inconsistent embroidery are natural characteristics. Protect all silks from direct and indirect sun as fading and disintegration are common. Bow and bias may be in excess of industry standards. These fabrics may also have a tendency to stretch in length. These characteristics are not considered defects and therefore, not reasons for returning fabric. Backing is recommended for upholstery use.

Heat Sensitive Fabrics

Many fibers used in drapery fabric construction are sensitive to heat and can cause puckering and hiked hems. Polyester is the most sensitive to heat and must be fabricated with a cool iron only. Acrylic and modacrylic fibers are also sensitive to heat. When measuring a drapery prior to fabrication, check to make sure that the drapery will not hang over a hot air duct or a baseboard heater as it will often affect the drapery once it is hung. Heat sensitive fabrics that are steamed or ironed often shrink or pucker.

Moire Fabrics

Moire fabrics have a tendency to fluctuate in length. They are sensitive to variations in humidity and shrinkage is very likely. Moires have a tendency to shrink due to excessive steaming and ironing or proximity to heating vents.

Pattern Repeat

Pattern repeat, as listed in this catalog and on samples, is approximate only and can vary slightly from one printing to the next. We cannot guarantee repeat matching.

Puckering

It is natural for some fabrics (i.e. hammered satins, satin stripes) to have a puckered or slightly wrinkled appearance. This is a characteristic of today's more relaxed, casual fabric constructions.

Sheers

Sheers will intensify in color when made into a drapery. Fold a sheer sample three times for a true color reading. Darker sheers have more of a tendency to fade or disintegrate than lighter sheers.

Shrinking And Length Fluctuations

Be tolerant of normal fluctuations in lengths of draperies. Few fabrics are completely stable. Fabrics breathe and absorb moisture, resulting in stretching or shrinking. Fabrics placed over or near heating and cooling vents may react to a much greater degree. Wesco will not be responsible should this situation occur. A 2% to 3% change is reasonable. Allow sufficient fabric in the hems for later adjustments, should it be necessary. Fabrics that are steamed or ironed often shrink or pucker.

Sun Protection

Fabrics should be protected from the sun. Wesco Fabrics does not guarantee against fading or color fastness. Draperies should be lined. Shades should be drawn during the day and glass protection should be used whenever possible. Window glass magnifies the destructive elements in the rays of the sun. The winter sun and reflection from the snow are even more harmful than the summer sun and may cause disintegration. Colors can fade by oxidation, "gas fading", if fabrics are kept in storage for too long a period without airing. Some colors are more sensitive than others. Impurities in the air may cause as much fading as direct rays of the sun.

Synthetic Fibers

Despite the impressive strides in the advancement of the technology of weaving synthetic fibers, performance will vary with the construction of the fabric and its application. Whole or partial synthetic constructions may have a tendency to react adversely more readily to atmospheric conditions than natural fibers.

Synthetic fibers are sensitive to heat, sunlight and steam. Shrinking, hiking seams, puckering and flaring are common characteristics.

Velvet

Velvet nap will crush and may be directional.

Washed Goods

Washed fabrics are processed to achieve a casual and soft appearance. Characteristics such as wrinkling, fading, and puckering are normal. Widths may vary. Bow and bias may be in excess of industry standards and guidelines.

Wrinkling

Wrinkling is a characteristic of linen and cotton blend fabrics.

Terms & Conditions

303.388.4101 · 800.950.9372

Aftermarket Finishes

Merchandise cannot be returned once it has undergone a process such as flame-proofing, water repelling, stain resistance, piece-dying, washing or dry cleaning.

Back Orders

If you approve your order as a back order and are given an expected shipment or arrival date to Wesco, please note that back orders may arrive earlier or later than anticipated. Cancellation may be granted (as described below) only prior to the vendor processing the order for Wesco.

Cancellations

You must obtain a cancellation number for order cancellations. Orders may not be canceled after work is in progress or special orders with vendors have been placed.

Collections

If your account is given to a collection agency you will be responsible for all collection & attorney fees.

Colors

Colors are not guaranteed. Due to color variability in computer and screen monitors, we have no liability if colors of the products do not match their display on the website.

Corrections

Wesco Fabrics, Inc. reserves the right to make corrections when and if an error is made on its part.

Customer's Own Material (C.O.M)

Wesco Fabrics, Inc. is not responsible for imperfections in customer's own material. Inspect your goods before shipping. All orders must be sent with a swatch of fabric attached for identifying purposes. Specify top side of fabric and pattern direction. If the "Up, Down, Front and Back" of the fabric patterns are not specified, it will be up to the workroom's discretion. Also, specify the name, color, pattern repeat, width and source of the fabric on your order. Your order will not be processed until all information is received.

Damaged Goods

If merchandise is lost or damaged in transit, please follow these four steps.

1. Have the delivery person note and sign for any shortages or damage to the outer container or merchandise on both carrier's and your copy of the delivery receipt or freight bill. **Do not refuse the merchandise** unless you can see that the merchandise is clearly damaged and will not be usable.
2. **Open all containers immediately and inspect the merchandise's condition, even if your installation is not until a later date.** Damage or shortage MUST be reported to Wesco Fabrics Customer Service immediately as follows: Custom Workroom and fabric within 10 working days of delivery; Finial Company within 20 working days of delivery; Paris Texas hardware within 5 working days of delivery; Simply Hardware within 15 days of delivery.
3. Contact Wesco Fabrics immediately for UPS damage. Contact the freight carrier for inspection of truck shipments. Keep the merchandise in the original shipping container and packaging.
4. After contacting the delivery carrier, call Wesco's Customer Service Department to request a replacement order.

Deposits

Orders exceeding credit limit require a deposit. C.O.D and prepay orders for custom, special order products, and samples must be prepaid including freight.

Discontinued Fabrics

Items not listed in this catalog might be found on www.wescofabricsoutlet.com.

Guarantees

Wesco guarantees all fabric and custom window treatments against defects in workmanship or material for a period of three months after date of shipment.

Alternative products may have separate guarantees. Please refer to the individual vendor catalogs for more information concerning alternative product guarantees.

Except as stated above, Wesco Fabrics, Inc. makes no guarantee or warranty, express or implied, concerning the merchantability of its products or their fitness for any purpose. Buyer assumes all risks and liability resulting from the use of Wesco Fabrics, Inc.'s products, whether used singly or in combination with other goods.

Terms & Conditions

303.388.4101 · 800.950.9372

Wesco neither assumes nor authorizes any person or entity to assume, for Wesco, any other liability in connection with the sale or use of its products. Any remedies available against Wesco by a buyer for any claim resulting from the sale of its products shall be exclusively and solely limited to return of the non-conforming goods intact for replacement or credit. Labor will be refunded only if done in Wesco's shop. We will not reimburse for labor not performed by our company. Under no circumstances shall Wesco's liability extend to interest, shipping, insurance, re-installation, trip charges or to any consequential damages of any nature.

For purposes of Wesco's guarantees, the following conditions **will not** be considered defective:

1. Flaws visible only when fabric is held against light.
2. Fading due to atmospheric conditions or undue exposure to sun.
3. Orders filled with more than one piece, unless special instructions have been received in writing at the time of order placement.
4. Variation in dyelot, unless a cutting was requested and approved by the buyer prior to placement of the order.
5. Patterns or repeats that do not match.
6. Natural characteristics as described in the ***Fabric Characteristics & Care*** guide.
7. Wear.
8. Handwoven/Silk fabrics.

Holds

Fabrics that are reserved on request will automatically be released after seven working days.

Length Of Cuts

Please provide the length of your cuts. Your order may be greater than the average size of pieces being received from the mills, or there may be flaws to work around.

Minimum Charge

The minimum charge per order is \$20.00 Dealer Cost.

Pattern Matching

Check pattern alignment before cutting for matching.

Prices

Full bolts (no cuts) of fabric (bolt sizes range from 50-100 yards) qualify for a 10% discount. Purchases of three full bolts (no cuts) qualify for a 15% deduction. The extra discount will not be issued for goods cut to size or inspected. Material used in our Custom Workroom is cut yardage and these discounts do not apply to fabric that must be cut. Full bolt purchases receiving special discounts will be shipped uninspected. Shipping, handling, insurance charges and sales tax, if applicable, are additional and will be

added to the final invoice. All amounts herein are subject to correction due to errors or omissions.

On-line price lists replace all prior price lists and are subject to change without notice.

Repeats

Repeats may vary.

Returns

All sales of alternatives, custom workroom, The Finial Co, Paris-Texas, custom furniture, velvet, chenille, silk or handwoven fabrics are final.

Fabric cannot be returned that has been processed or cut by the purchaser in any way. A return authorization (RA) of fabrics in original condition may be granted with a restock fee within thirty (30) days of shipment by contacting Wesco Customer Service and obtaining an RA number and providing reason for return for products listed below:

Up to 5 yards.....	No Return
6 to 10 yards.....	50%
11 to 25 yards	30%
26 to 60 yards	20%
Full bolts (no cuts).....	10%
Labor.....	None
Sample Books (Less than 6 mos. old)	15%
Furniture & Accessories (No special orders)	25%

Shipping

Unless shipping preference is designated, we ship the least expensive way. Applicable freight charges are added to all orders shipping outside the continental United States. Shipping to a residential address incurs an additional UPS fee. UPS will not ship anything over 108" in length or 130" in length and girth. Girth is the measurement around the box. If either dimension is exceeded, the order must go truck. Oversize charges begin at 84" in length and girth or over 60" wide. Please check the UPS website for exact pricing information at:

<http://wwwapps.ups.com/calTimeCost>.

Terms

Invoices on Net 30 accounts are due thirty (30) days from invoice date. Other terms are C.O.D., prepay, and proforma. A late charge of 2% per month (annual rate of 24%) will be charged on all past due accounts.

Wesco Account Number

Please write your Wesco Account Number on the front of your catalog and list on all orders or payments.
